

WEDNESDAY, APRIL 18.

DEMOCRATIC TICKET.

For County Judge - R. T. WILLIAMS.
For County Clerk - ROYAL H. HARRISON.
For Sheriff - J. P. STEVENS.
For County Attorney - F. L. FLEMING.
For Assessor - JOHN M. MASON.
For Justice - JAMES A. MEXIA.
For Surveyor - W. H. BROWN.
For Coroner - J. W. BRADLEY.
For Postmaster - H. H. HARRISON.
For Treasurer - J. W. BROWN.
For Comptroller - J. W. BROWN.
For Assessor - J. W. BROWN.
For Justice - J. W. BROWN.
For Surveyor - J. W. BROWN.
For Coroner - J. W. BROWN.
For Postmaster - J. W. BROWN.
For Treasurer - J. W. BROWN.
For Comptroller - J. W. BROWN.

MAJOR G. MATT ADAMS has taken care of the Pension agency at Louisville.

At Memphis last Wednesday an N. & M. V. box-car was smashed to pieces in a collision. It contained 20,000 pounds of stick dynamite. It seems a miracle that no explosion occurred and no one was hurt.

The effervescent, ubiquitous and ever-loving Thos. S. Pettit has refused the nomination tendered him by populists of the Second Congressional District. He got up right in the Convention at Henderson Saturday and "spoke out" and told them he couldn't. Did you ever?

It will be remembered that two years ago Rev. George W. Dennis was run over by a train of cars in Louisville and both legs and arm cut off. He used the railroad company for damages and last week was awarded \$5,000. He is not satisfied with the verdict and is asking a new trial. He sued for \$25,000.

ONE C. C. Moore, of Lexington, has been called blasphemous under suspicion as his recent newspaper succeeded in so stirring up the people against him that he has been indicted by the grand jury. He has employed Bob Ingersoll to defend him and will turn loose on Kentucky a flood of infidelity and meretricious sophistry from the New Yorker. "Boy old Kentucky! Her shame accumulates."

Ten few Republicans of Davies county got themselves together Saturday and named the following ticket: R. W. Bennett for County Judge, C. W. Kimbrell for Clerk, T. L. Karm for County Attorney, Alfred Thronson for Sheriff, James H. Forrester, T. Allen for Justice. This is our Charles Kimbrell, and he would better be keeping in fun and funds by spinning around on a "flying doctorman" than wasting his time and his substance in chasing rascals. The Democrats will always fill the offices in Davies.

HANCOCK county has done the wise thing by appropriating \$100,000 surplus money now in her treasury for the building of good roads for the county. The mistake the fiscal court made was in not directing that the road should be turnpikes. There is small gain by turning the surplus money upon mud roads unless it is to be followed up by continuous appropriations to keep the roads in repair. Every mile of pile road built in a county is a heritage to the county which will descend to the remotest generation. The age is bound to be better.

It is stated that Adjutant General Wickliffe will resign and State Senator Backcross will be appointed to fill out the unexpired term. Mr. Backcross held this position by appointment of Governor Brown, but resigned to accept the Senate. He now wants to hold the office, and it is said Governor Brown will accommodate him. Neither Senator Gross nor Governor Brown had a better friend in Kentucky than this Backcross, and it is a friendly spirit that we suggest that this is going most to him. Senator Gross is a good enough man, even if he did not distinguish himself in his race against his opponent for the Senate last year, but the democracy of Kentucky feel that the man who has been one office is quite enough for Mr. Gross. Governor Brown might better find this out before the proposed move is made than afterward.

The Democratic primary to Davies county Thursday resulted in the following nominations: For County Judge, J. B. Brown; for County Clerk, J. B. Brown; for County Attorney, J. B. Brown; for Sheriff, J. B. Brown; for Justice, J. B. Brown; for Surveyor, J. B. Brown; for Coroner, J. B. Brown; for Postmaster, J. B. Brown; for Treasurer, J. B. Brown; for Comptroller, J. B. Brown.

OUR JAIL. It is not strange that prisoners should escape from the present jail of this county. In fact, it is rather strange that the present crowd do not leave the place some day. The jail is a body. There is one and only one way to be sure this will not happen. That is for the Jailor to stand guard day and night near the cells.

put at rest any lingering hope any other party might have been indulging as to the county's politics. About 3,000 good men and true said they are still Democrats. Good for all Davies.

A MIND at all inclined to misanthropy has had ample stimulation in recent events in this county. The shameful lack of force on the part of the present national Congress, the sickening details of the miserable Breckinridge trial and the falling into gloom of brilliant life everywhere, have been enough to make a truly good man sick at heart. The man who little more than a year ago was lecturing to female colleges all over the country upon "Social Purity" becomes by his own confession a convicted libertine and liar. Another famous lecturer, regarded as a great and good man gets drunk at Lexington to deliver his famous lecture "The man of Galilee," which is justly regarded as one of the grandest trilogies ever put to the life and character of Jesus Christ. Good people, however, may even yet thank God and take courage, for as these meteoric characters turn to dust before the eyes of men, the stars still shine. There are yet good men and pure women. There are yet virtuous homes and God-honoring souls. Let the shame and the blot on the banner be forgotten. Let the Lord still reign and let the yet virtue and religion which in the country to save it.

What the Party Has Done. The Democratic party has repealed the Republican election law. The Democratic party has repealed the Sherman act. The Democratic party is cutting down appropriations and is practicing economy.

The Democratic party of the House has voted to the State bill reducing taxes on imports \$70,000,000 and relieving the country of the burden of an indirect tax of five times \$70,000,000. In 1890 the Republicans passed the Sherman act and the McKinley bill. The party was warned of the effect these measures on currency and on commerce.

Democracy in debate declared that distances were inevitable; that confidence would be shocked; that trade would be interrupted; that we would repeat in 1900 the disastrous experience of 1892. Those predictions have been fulfilled. Last year before the election the storm broke on the country. Banks failed, mills closed, furnaces went out, blizzards and distress everywhere prevailed.

The task before the Democrats was a serious one. Measures of relief were demanded and have been provided; but, unfortunately, legislative bodies are slow and uncertain. The people await the action of the Senate. The Sherman act has been deprived of its worst features and a new tariff bill has been introduced. There can be no possible action in business until the country know the basis of foreign competition. The Democratic party is not responsible for this delay; it has done what it could. The Republicans of the House retained the Wilson tariff at every step. The Democratic party is not responsible for this delay; it has done what it could. The Republicans of the House retained the Wilson tariff at every step.

THE PLAINTIFF WINS. The sensational trial of Madeline Pollard against W. C. P. Breckinridge, Congressman from the Ash Grove district, terminated at Washington Saturday, after a trial five weeks, by a verdict of \$15,000 for the plaintiff.

No suit in the history of the country has been watched so closely by the public as this one. The trial was a sensation. The complaint was for breach of promise of marriage, under which promise the plaintiff claimed to have been seduced by Col. Breckinridge. The story of her seduction was one of the most feeling ever told. She told how for nine years she had sustained intimate relations with the Congressman, and how he had promised to marry her. She told how he had seduced her, and how he had broken his promise.

OUR JAIL. It is not strange that prisoners should escape from the present jail of this county. In fact, it is rather strange that the present crowd do not leave the place some day. The jail is a body. There is one and only one way to be sure this will not happen. That is for the Jailor to stand guard day and night near the cells.

new jail must be built or justice must come to be only a name here. A light steel bar 1 inch thick and 1/2 inches wide is the only thing between the prisoners in jail and their liberty. With the present number in the cells it is impossible to prevent plans for escape being constantly formed. There is not room to separate the prisoners, so that with about fifteen feet square, no wonder they are constantly planning to escape.

The building is too small to accommodate any good number of prisoners and it is but a half, offering almost no resistance to persons desiring to escape. Those who don't wish to be there are constantly planning to escape. Those who are interested in seeing justice properly administered here, are invited to call and see the place where our criminals are confined. One of two things must happen—we must have a new jail or justice in this county will be totally destroyed.

AMONG OUR EXCHANGES. The editor of an exchange, who apparently knows what he is writing about, says a newspaper has 3,000 readers for each 1,000 subscribers. A merchant who puts out 1,000 hand-bills gets possibly only 500 people to read them. The editor of an exchange, who apparently knows what he is writing about, says a newspaper has 3,000 readers for each 1,000 subscribers. A merchant who puts out 1,000 hand-bills gets possibly only 500 people to read them.

HOW TO REACH THEM. The editor of an exchange, who apparently knows what he is writing about, says a newspaper has 3,000 readers for each 1,000 subscribers. A merchant who puts out 1,000 hand-bills gets possibly only 500 people to read them. cape alone, one-half pound; blue vitriol, one-fourth pound; black antimony, one ounce. Grind and mix well the remedy for the following directions for use: 1. Stick holes in the ground to be treated. 2. Put in the large hose or eight small ones in each place. 3. Feed nothing but dry feed but no water, only the slop containing the medicine. 4. As a preventive refuse to eat, turn them on their backs, and with a long-handled spoon put the medicine into their mouths. 5. As a preventive one teaspoonful once a week will keep your hogs in a healthy condition. 6. No other stock but hogs have access to this remedy, keep it well. 7. No other stock but hogs have access to this remedy, keep it well.

MONTHLY CROP REPORT.

The reports from the correspondents for the month of March are very large, and differ very much. All the reports were written before the freeze, except the one from the agricultural interests of the country in a very flourishing condition; all farm work well advanced; farmers ready to plant corn, wheat, rye, oats and barley all looking as well as any one can recollect to have seen them; grasses of all kinds were very advanced; clover everywhere being planted; in fact, every kind of vegetation indicated that the month was very good. The reports were very different. The condition of the wheat crop is somewhat uncertain; all correspondents write that the early sown wheat, "that was justifying," has been killed, but that it will still stand in the spring; wheat, and that the late sown wheat is considerably damaged, and looks very badly for a harvest. A few days ago we saw tell all that it is killed, and will not undertake to make a percent of its present condition of the crop, for we had added up all of my reports, "those written before the freeze and those written after," would not give a correct statement. I will, therefore, wait another month, as there are a number of good farmers who say that they cannot tell the extent of the damage until the warm rains. The condition of the rye and barley crop is very similar to that of wheat, rye being a much harder crop, is not damaged as much, but as they are all growing so rapidly and so full of sap, the freeze coming so suddenly, some think that they have suffered.

Clover.—Nearly all of the correspondents report young clover all killed. This will be a very heavy loss to the farmers, as the seed was very high. A correspondent from Clark county writes: "Young clover seed, and old clover fields that are laid low, and small like clover hay springing in summer."

Oats.—A correspondent from Stafford, Lincoln county, writes: "Oat crop generally killed by the late freeze; some are showing." This is a report of nearly all of the correspondents in regard to the oat crop. I would advise not to be in oat crop, as it will be a very heavy loss to the farmers.

Barley.—A correspondent from Stafford, Lincoln county, writes: "Barley crop generally killed by the late freeze; some are showing." This is a report of nearly all of the correspondents in regard to the oat crop. I would advise not to be in oat crop, as it will be a very heavy loss to the farmers.

Wheat.—A correspondent from Stafford, Lincoln county, writes: "Wheat crop generally killed by the late freeze; some are showing." This is a report of nearly all of the correspondents in regard to the oat crop. I would advise not to be in oat crop, as it will be a very heavy loss to the farmers.

Rye.—A correspondent from Stafford, Lincoln county, writes: "Rye crop generally killed by the late freeze; some are showing." This is a report of nearly all of the correspondents in regard to the oat crop. I would advise not to be in oat crop, as it will be a very heavy loss to the farmers.

seed bed, the place selected being a loose, sandy soil, made reasonably rich and clear of weeds or weed seeds. One advantage of seed sowing is, that the seed is not so liable to be washed away as it is when it is sown in a hole. For this reason many farmers plant corn in a preliminary to making a tobacco plant bed.

The seeds are very small and are necessary in sowing not to get them too thick. If too thick in the seed bed the plants will grow tall and spindling, while stocky plants are far more hardy. If care is taken to have a good seed bed, and to prepare it well, no cultivation will be needed. What few weeds may come in are pulled off by hand, and the plants are left to grow. As with all cultivated crops, the seed will pay to pains to prepare the soil before setting out the plants, as this not only gives a better growth of the plants, but makes the work of cultivation much easier. Flow, harrow or drag until the desired tilth is secured, in many cases it is the last harrowing or ridding that gives the best result. When the plants have three or four leaves and are three or four inches high, they are large enough to transplant where they are to grow. If to be cultivated both ways, mark out the rows three feet apart each way. It is very important in transplanting to see that the roots get dry, and also to see that the soil comes in close contact with them. Usually the more carefully the seed is sown, the more will be the loss in transplanting and the better the start to grow.

Queer Cases of Divorce.
A Kansas wife recently secured a divorce from her husband because he was a member of the "Klans." The defendant pleaded the necessity of the plaintiff, causing it to become real. The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction. The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

How Much Rain Will Fall?
The Weekly Courier-Journal has struck a popular note in its forecast of the weather. A wonderful amount of interest was taken in its forecast of the weather. A wonderful amount of interest was taken in its forecast of the weather. A wonderful amount of interest was taken in its forecast of the weather.

Missouri wife was lately granted
because "the defendant goes gadding about, leaving the plaintiff's children in the hands of a stranger." The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

Illinois wife secured a divorce
because "the defendant goes gadding about, leaving the plaintiff's children in the hands of a stranger." The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

Connecticut man got a divorce
because "the defendant goes gadding about, leaving the plaintiff's children in the hands of a stranger." The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

Wisconsin man got a divorce
because "the defendant goes gadding about, leaving the plaintiff's children in the hands of a stranger." The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

Virginia woman was not free
because "the defendant goes gadding about, leaving the plaintiff's children in the hands of a stranger." The plaintiff, however, was not satisfied. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.

from some talent of sin. Humanity is weak even in its goodest form, and one thought of us about feeling ourselves very high and mighty, and one thought of us about feeling ourselves very low and mean. There will be a fall that will prove to us that we are as weak as those whom we have regarded as weak and foolish.

Big for His Age.
(From the Herald.)
The town of Westville, Mo., has a curiosity in the shape of a boy 12 years old who is five feet, seven inches in height, and weighs 292 pounds.

The boy's name is Johnny Wade, and he is the eldest son of Mr. and Mrs. N. Wade, an estimable couple of that place. Mr. and Mrs. Wade have been blessed with a family of seven children in all, five boys and two girls, but with the exception of Johnny, none are above the average in height or weight.

A peculiar theory is advanced to account for Johnny Wade's enormous size. It is said that from the time he was able to walk it has been his habit, to the slaughter pen and there to drink quantities of the blood of heifers just slaughtered. It is believed that this practice is what gave him his phenomenal growth.

The boy is the pet and curiosity of the whole country round about there. He is a good natured and inoffensive fellow. His relatives on both sides are small people, or below the average in size or weight.

The more Chamberlain's Cough Remedy is used the better it is liked. We know of no other remedy that is so easily given satisfaction. It is good when you first catch cold. It is good when you have a cold. It is good in any kind of a case. We have said twenty-five dollars of every body has given satisfaction.
